

This conference is carbon neutral!

The carbon footprint of the conference is:

- 3t CO₂ equivalents for the conference itself (heating, electricity, catering)
- 130t CO₂ equivalents for the travel of the participants to Hamburg

→ For the offset the GHG certificates are sourced from a wind farm project in China registered with the Gold Standard for verified emission reductions (VER)

→ The calculation of the carbon footprint and the sponsoring of the offsetting for all travel emissions is done by PE INTERNATIONAL
